

***** Winter Salting Priority Schedule *****

Due to a substantial increased cost and limited availability of road salt this year, the Village has made changes to our winter salting schedule.

- During a **snowfall event**, only primary and secondary streets will be salted to bare pavement, as well as all intersections, steep hills, and dangerous curves. As always, all Village streets will be plowed.
- In the case of an **ice event** - all Village streets will be salted.
- The Public Works Department will be using an anti-icing/de-icing liquid mixed with the salt which will improve the efficiency and most likely reduce application rates.
- When referring to the map, you will see that on the streets that are not salted, you will only travel a short distance before coming to a primary or secondary street salted to bare pavement.

We thank you for your understanding in our change of policy and as always we will continue to keep our Village streets safe for our community. (Waterville Public Works Department)

- WINTER SALTING PRIORITY SCHEDULE**
1. **PRIMARY STREETS**
 2. **SECONDARY STREETS**
 3. **PARKS**
 4. **ALL INTERSECTIONS, STEEP HILLS AND DANGEROUS CURVES**

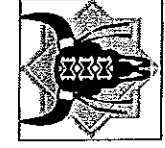

NOTE: ALL STREETS TO BE SALTED FOR AN ICE STORM
