

# CONSTRUCTION ZONE

**The existing waterline along the north side of Michigan Avenue is very old and has experienced several breaks over the years.**

**Beginning August 17, 2015 Buckeye Excavating & Construction will begin the replacement of the existing waterline along the north side of Michigan Avenue from Waterville-Monclova Road to Wilshire Drive. The project is expected to last for 8 to 10 weeks.**

**During construction the drive aprons on the north side of Michigan Avenue will be closed for short periods of time when construction is across the drive and when the drive itself is replaced over the new waterline. If your driveway will be closed you will be notified 24 hours in advance. Every effort will be made to provide continuous access to business in the construction zone.**

**During working hours, only one lane of Michigan Ave will be open to traffic. There will be flaggers or temporary signals directing alternating traffic onto the one lane. Cross streets, that have another outlet besides Michigan Avenue, will be closed periodically during construction.**

**Thank you for your patience and cooperation during this work.**

**If you have any questions or concerns please contact**

**Ken Blair, Public Works Director, City of Waterville: 419-878-8108.**
